

AURORA SUSPENDED FIRES

Australia's premium suspended fireplace. It is completely revolutionary, a combination of a unique fireplace and an art piece, in a perfect balance.

HOW DO WE WORK?

It all starts here...

Aurora Fires are securely connected in the roof space on a stainless steel ceiling bracket which is custom made to fit the pitch of the customer's ceiling.

A stainless steel ball bearing system connects the firebox to the lower flue, enabling the fire to be rotated around 360°. This unique feature allows the fire to be easily directed to face any part of the room.

Aurora Suspended Fireplaces are open fireplaces, available as wood burning, bioethanol or a wood/bioethanol hybrid and come in a range of sleek finishes.
